

## THERMAL IMAGING

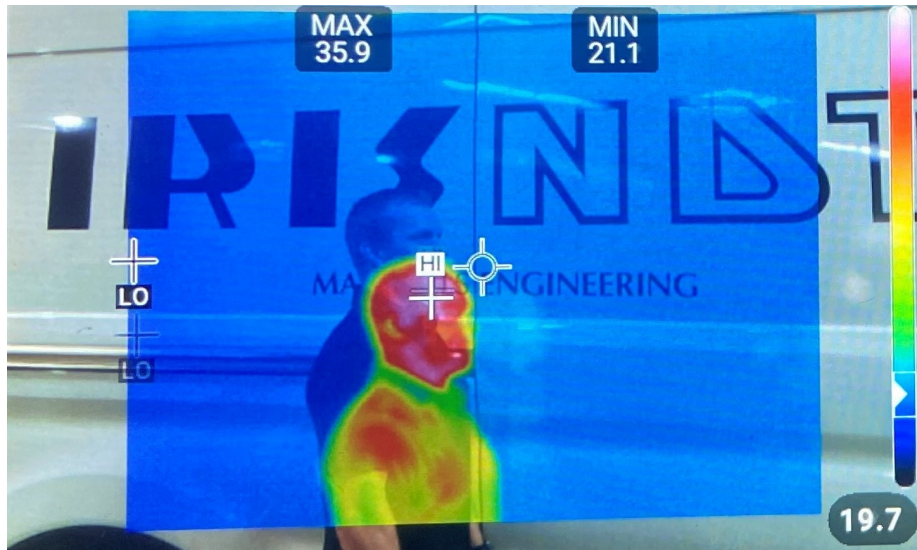

- Identify potential health risks
- Comply with social distancing
- Increased control of personnel allowed onsite
- Trained clinical thermal imaging technicians
- Relatively quick procedure
- Low operating cost
- Small area required for setup
- Non-invasive

### Medical Thermography - Screening for Elevated Body Temperature

IRISNDT can carry out temperature screening of personnel using thermal cameras. This allows companies to be more discreet, efficient, and effective in identifying individuals that may require further screening with virus- specific tests.

Temperature measurements can be taken from 1-2 meters away meeting social distancing guidelines.

Our personnel are trained in Clinical Thermal Imaging.
